Langmeier Backup

Langmeier Backup 10 Business

- Create full backups with emergency Windows for recovery
- Backs up individual partitions, folders and files in addition to complete PC's
- Daily automatic data backup on hard disk or to the cloud
- Protects against encryption Trojans

Langmeier Backup 10 Business creates complete backups and backs up disks, partitions, folders and files. The program backs up to external media, file servers, NAS or the cloud and keeps these backups up-to-date on their own. Langmeier Backup 10 Business protects computers and backup locations from ransomware and prevents encryption Trojans from accessing the backup. The central backup monitoring console is included in all Langmeier Backup 10 subscriptions and ensures that IT administrators keep track of the data security of several computers.

- Complete backup of Windows computers, laptops and tablets
- Folder and file backup and automatic update of the created backups
- Protection against ransomware protects against encryption Trojans
- Backup to external media as well as to the cloud
- Rescue media to restore the operating system
- Backup planners for automated start-up backups
- Backup monitoring with central monitoring console
- Backup logs and wizards for easy management of backup media
- Incremental and differential backup for advanced backup concepts
- Historical backup allows you to restore to a date in the past
- Backup logs via e-mail and send the backup status via SMS short message
- Custom backup with VB scripts and advanced expert options
- German-language user support

Backup and restore:

Function	Description
Securing the operating system	Protects desktop computers, laptops, and Windows tablets from hard drive failures, system failures, or unintentional deletion of data.
Emergency Recovery	Restores the entire computer with a bootable emergency Windows.
Full fuse	Backs up a disk completely 1:1 into a disk image.
Incremental backup	Backs up only the most recent changes as a disk image, since the last full backup or incremental backup.
Differential fuse	Saves only the most recent changes as a disk image, since the last full backup.

Langmeier Backup 10 Business Functions:

Function	Description
Media support	Backs up disks, partitions, folders, and files.
Protection against ransomware	Protects against encryption Trojans.
Online backup	Backs up data to an FTP server or to the public or private cloud.
Hardware-independent - Recovery	Restores the computer to modified hardware.
Encryption	Encrypted backup to the cloud and on-premises media protects backup data from unauthorized data access.
Versioning and tidying up	Each change to a file can be backed up as a separate version. The wizard can be used to delete older data or reset the backup level. Changed data is thus always retained.
Help and support	German-language written and telephone support.
