Langmeier Backup 10 Essentials

• Create full backups with emergency Windows for recovery

• Backs up individual partitions, folders and files in addition to the complete PC

• Daily automatic data backup on hard disk or to the cloud

• Automatically keeps created fuses up to date

Langmeier Backup 10 Essentials creates full backups, backs up partitions, folders, and files. The program updates the created data backups regularly and automatically. The program backs up to external media or to the cloud and keeps these backups up-to-date on their own. In the intuitive user interface of the Langmeier Backup 10 Essentials, users have control over the security of all personal data. Central backup monitoring is included in all Langmeier Backup 10 subscriptions and ensures that IT maintainers keep track of the data security of several computers.

• Complete backup of Windows computers, laptops and tablets

• Folder and file backup and automatic update of the created backups

• Backup to external media as well as to the cloud

• Rescue media to restore the operating system

• Backup planners for automated start-up backups

• Backup monitoring with central monitoring console

• New interface for an intuitive user experience

• Backup logs and wizards for easy management of backup media

• German-language user support

Backup and restore:

Function	Description
Securing the operating system	Protects desktop computers, laptops, and Windows tablets from hard drive failures, system failures, or unintentional deletion of data.
Restore operating system	Restores the entire operating system easily and in a few steps. All data and settings are reset to the selected backup level.
Updating the backup	Automatically keeps the data backup up-to-date.

Langmeier Backup 10 Essentials Features:

Function	Description
Backing up files	Backs up disks, partition, folders, and files.
